FORTUNA

Build. Backtest. Invest.
Bridging the gap: TradFi meetsDeFi via ETFs

Problem

1. **Global Finance** is moving on-chain

2. Retail Investors are **paralyzed by complexity.**

3. **No Bridge** between prudent capital to digital assets.

The Solution

Creating the Vanguard of crypto.

Narrative-Driven Portfolios

- Swap 10,000 confusing tickers for thematic, 1-click indices.
- Buy "Digital Gold" or "L2 Infrastructure" with the simplicity of an ETF.

Institutional Vaults

- Bank-grade safety built on a non-custodial architecture.
- You always control your assets, completely insulated from counterparty risks.

The "Time Machine"

- Institutional-grade backtesting.
- Validate your strategies against 10 years of historical TradiFi and Crypto data before risking a single dollar.

How does it work?

Choose the narrative you believe in.

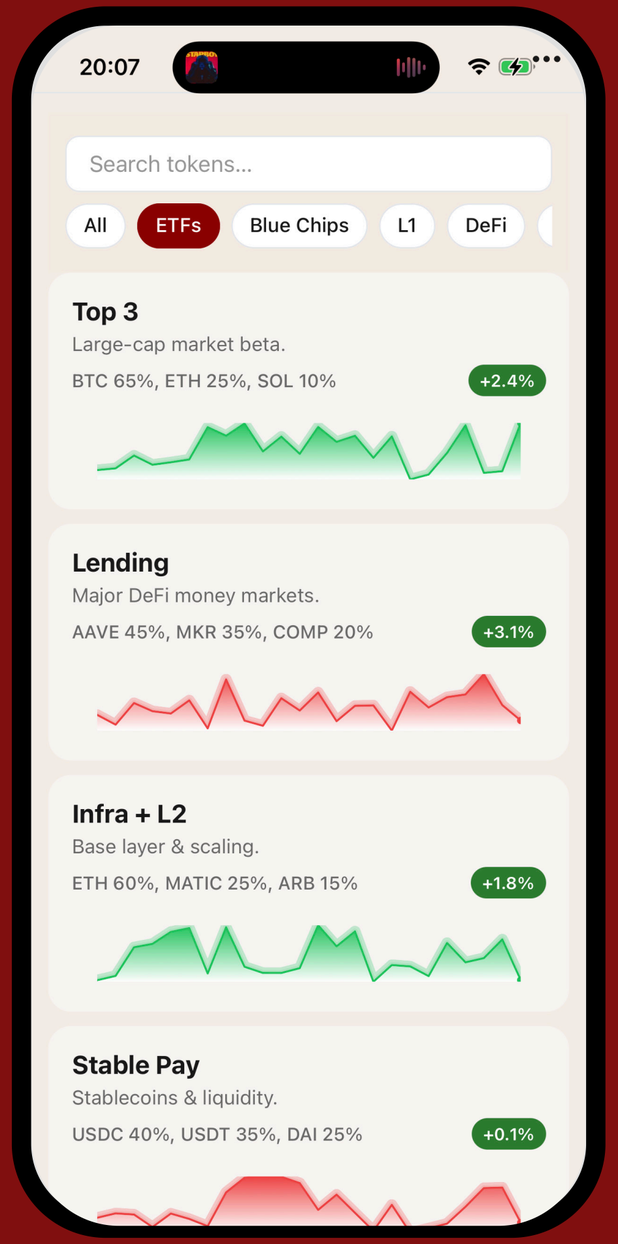

We replace incomprehensible tickers with **clear themes**

You invest in ideas you believe in.

Tokenized Property

AI

Healthcare Tech

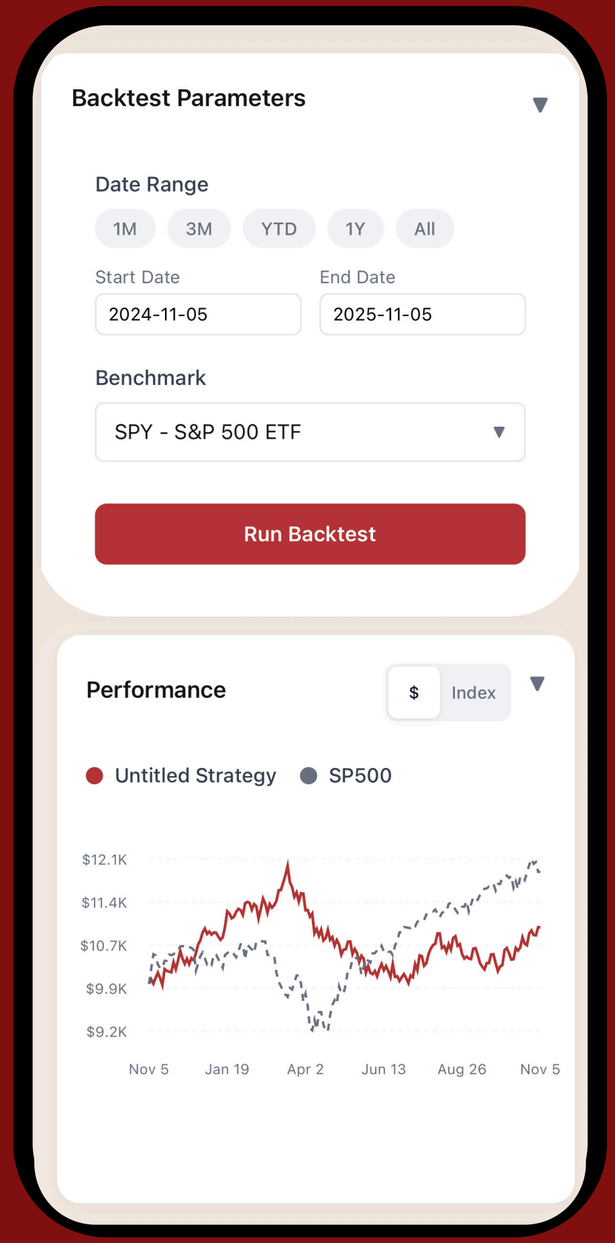

How does it work?

Backtest & Learn

We **remove the gambling effect** by providing the backtesting feature.

Utilize **historical market data** to test your chosen crypto narrative against traditional benchmarks such as the S&P 500 or Apple stock.

Learn and adjust for better investing.

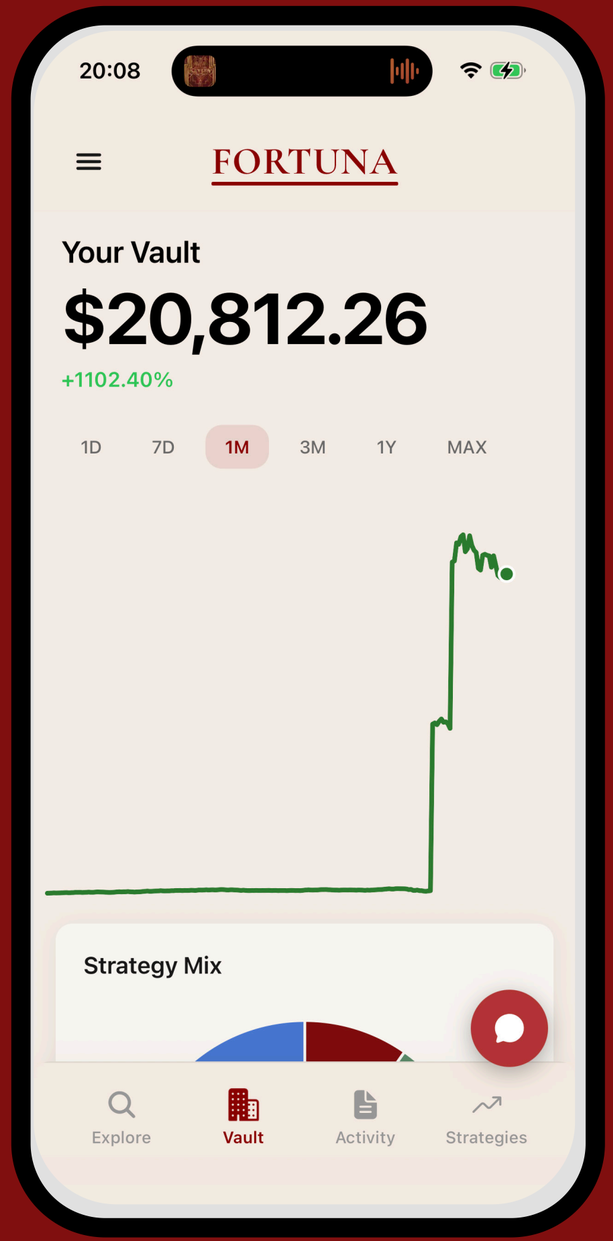

How does it work?

Passive Execution

Instant Deployment: Capital goes directly into diversified, ETF-like vaults.

This removes complexity, lowers volatility, and ensures a highly safe environment for your assets.

Why Us?

1)Passive Execution

ETF-style diversification

2) Narrative Mapping
Clear links to real-world asset value

3) Non-Custodial Safety
You hold the keys, we guide you

4)"Time Machine" Data"
Institutional backtesting for retail

5) Fully Regulated

Licensed under MAS in Singapore

6) Transparent Low Fees
0.65% flat rate, no hidden spreads

Market Size

*Target AUM based on a highly realistic $2,000 initial wallet size per user

Total Addressable Market

$84T

The Great Wealth Transfer flowing to digital-native generations through 2045.

Serviceable Obtainable Market

$52,8M*

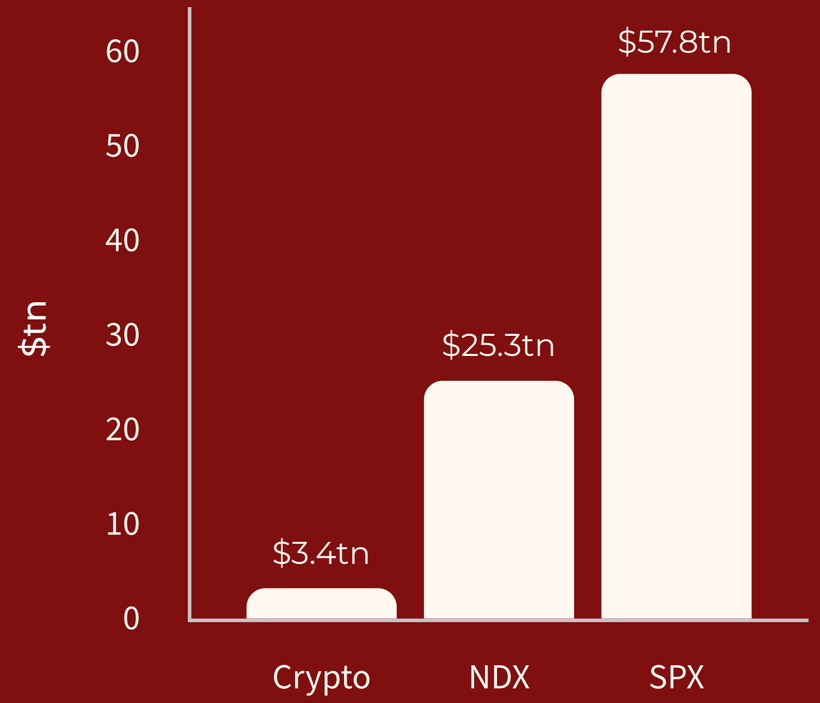

We are targeting Singapore's Confidence Gap, the **1.3M adults** who hold stocks yet reject crypto due to friction. We aim to capture **26,400 target users**, a conservative 2% of this audience within 18 months.

Serviceable Addressable Market

$5.6T

Projected size of the Passive Index market applied to Tokenized Assets by 2030.

Market Overview

CRYPTO CONSISTENTLY OUTPERFORMS TRADITIONAL ASSETS.

Business Model

Phase One: Non-Custodial

1) Transaction fees
0.65% Platform Convenience Fee per swap.

2) Fiat On-Ramp Spread
0.5-1% Partner Processing Fee, usually shared with MoonPay/Stripe

3) SaaS Subscription
15$/month (Premium Data & Analytics Access Fee (e.g. TradingView, Nansen)

Business Model

Phase Two: Custodial (additional allowed fees:

4)Net Interest Margin
2.5% (Interest earned on Fiat float (SGD/USD) held in bank trust accounts)

5)Custody / Admin Fee
0.1% (Annual fee for "Safeguarding Assets"

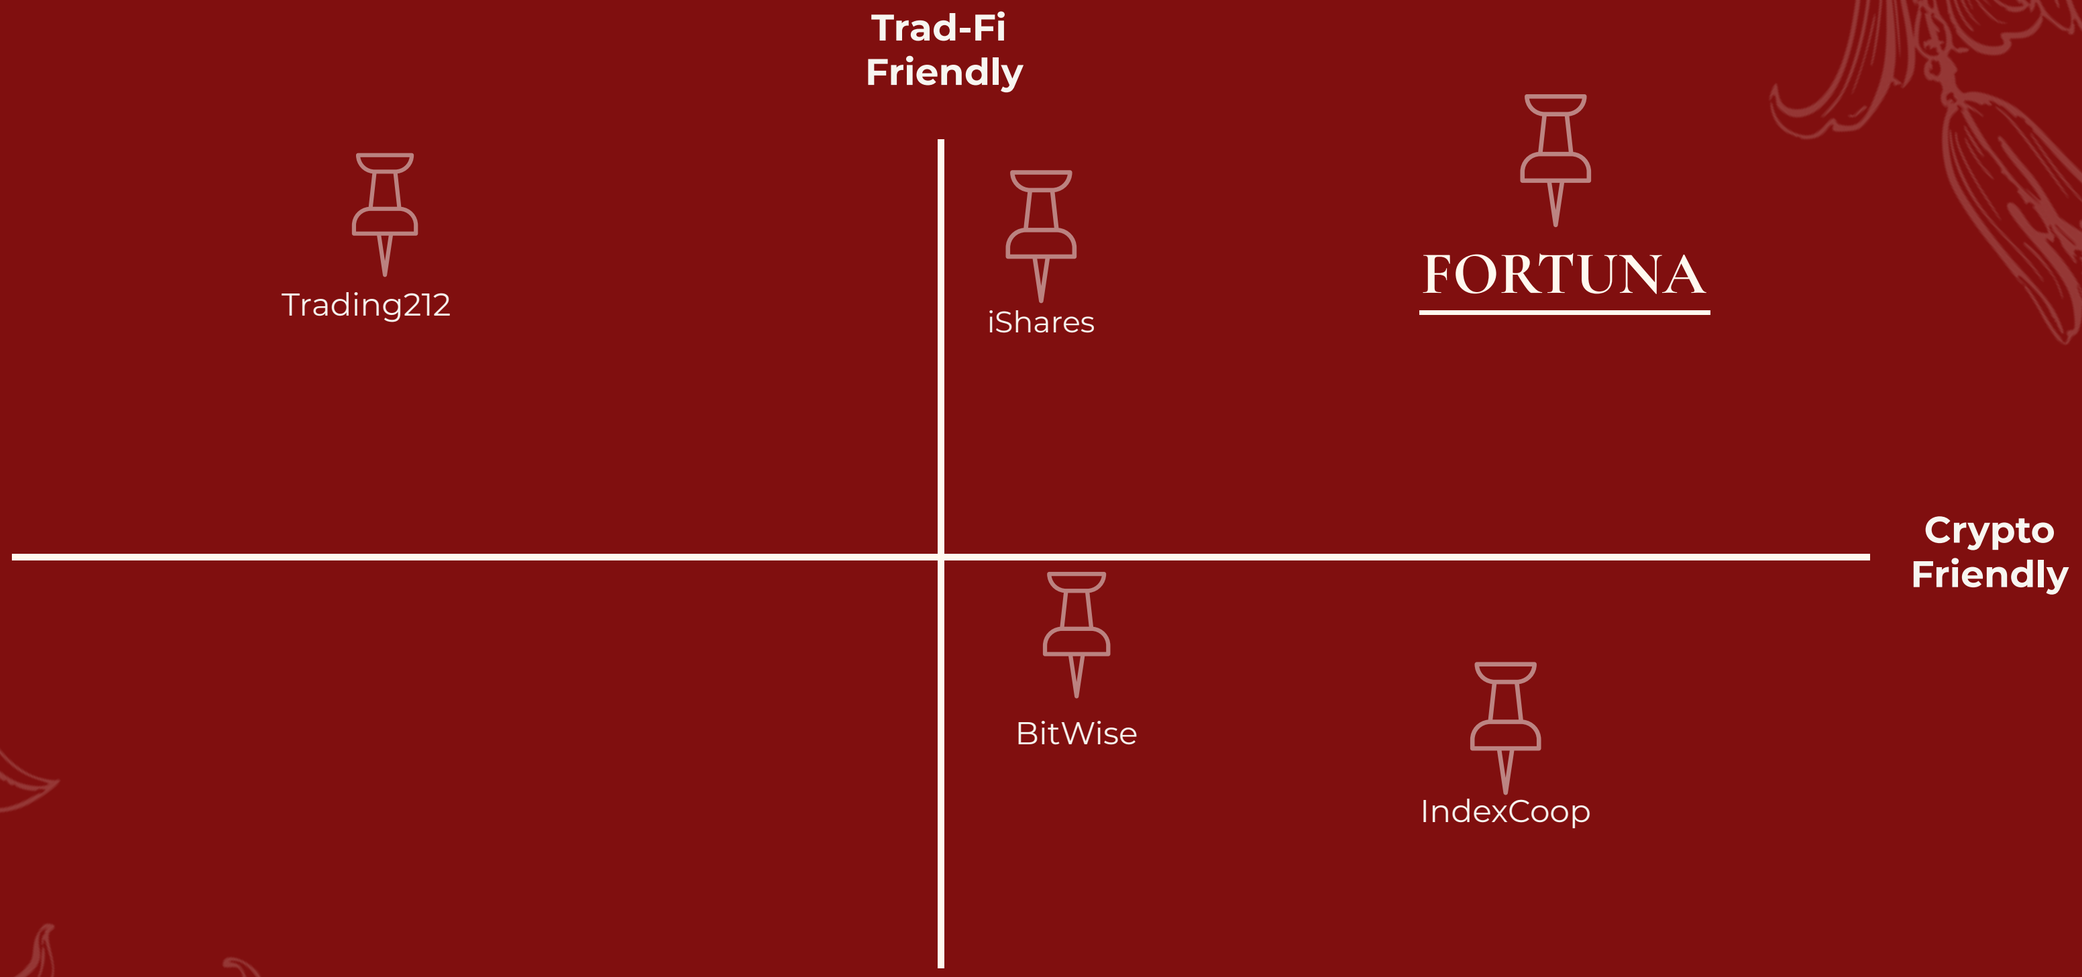

6)FX / Token Spreads - 0.5%
(Baked into the price of the token. Invisible to the user

7)Withdrawal Fee
5$ flat for all users

8)Staking/Yield Share
(professional/accredited investors only) - 20% of the staking award
